Subject: Microsoft Settlement

I've been following this trial very closely,
and I believe
the settlement, as it stands, is either a
farce or a travesty.
And I think it's too serious to be a farce.

It's time to once again remind the
disillusioned citizenry that
this country does not have a price tag.
Money CANNOT be given
this much power, or I dread the future I will
be consigning my
children or grandchildren to.

The road to megacorpocracy is paved with tiny
little stones;
please, reject this settlement for the sake
of our children.
